DETAILED ACTION

Allowance

Claims 16-17, 27, 29 and 38-41 are allowed.

1. The following is an examiner's statement of reasons for allowance:

Regarding **claims 16, 29 and 39-41**, the prior art of record fails to suggest or disclose the logging step by the user comprises placing a call to a telephony platform, holding the call on an incoming leg by the telephony platform, creating an outbound leg by the telephony platform to a server, directing extractors for a VoiceXML stream for authenticating the user and authenticating the user. It is not obvious to modify Johnson adding the logging steps described above because Johnson invention allows a user that has already logged into a computer system to access multiple information.

Regarding **claims 27 and 38**, the prior art of record fails to suggest or disclose automatically identifying the information desired by the user without the user being prompted for inputs and performing an actionable step in a single phone call session by instructing the telephony platform to place an outbound call, putting the call on hold and later reconnecting to the call on hold. It is not obvious to modify Johnson adding the identifying step and the performing actionable step described above because Johnson invention allows a user a single phone call to access information and the dispatcher cannot place an outbound call.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
